SeeCloud

HTS
Extending Your Vision

## LPR made simple, secure and affordable for all

Cloud-based License Plate & Vehicle Recognition System

HTS's **SeeCloud** is the most effective, cost-efficient license plate recognition system available today. We've put our high-end engine in the cloud to provide you with the most flexible, scalable LPR and vehicle recognition system as a Software-as-a-Service (SaaS).

SeeCloud's cloud-based architecture means that there is no infrastructure to install or maintain – just supply the images and access the data – in real-time.

SeeCloud Architecture

Just register for the service. Then start sending images and receiving your data – it's that simple.

SeeCloud Features and Benefits

- Scale the system as needed using the SeeCloud pay-as-you-grow model

- No special, costly camera requirements – let HTS's best-of-breed recognition techniques do the work.

- No costly infrastructure worries – just send images and access the data

- Benefit from our in-the-cloud server upgrades, you'll never have to upgrade

- Competitively-priced SaaS
